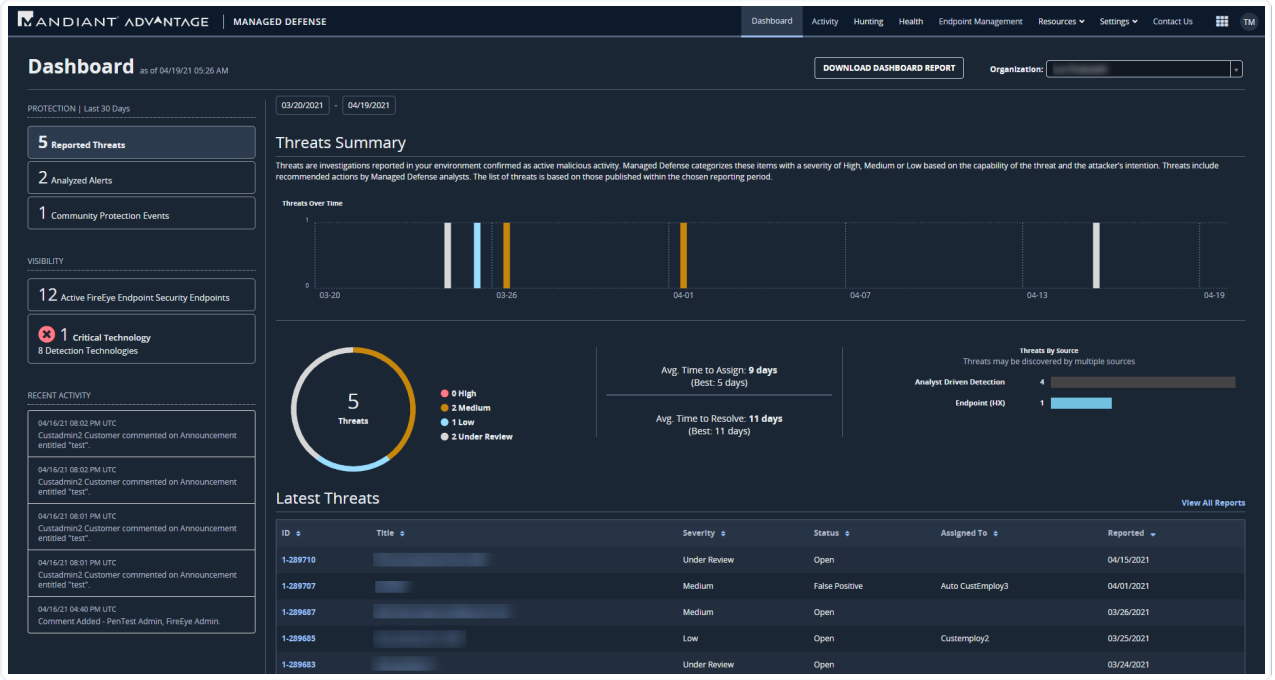
THE MANAGED DEFENSE PORTAL

The **Managed Defense Portal** **(https://md.mandiant.com)** provides you with the information you need to track your Managed Defense subscription service metrics, act on Investigations, and determine the overall health of your appliances and software ecosystem.



The Managed Defense Portal contains various menus that allow you to quickly access information about any threat-related activity, including threat alerts and reports, and information about the health of your network and endpoint devices. The following table describes the menus available in the portal:

Managed Defense Portal Menu	Description
Dashboard	View real-time status updates for your Managed Defense service components.
Activity	View and respond to compromise reports including Investigation and Incident alerts.
Hunting	View the status of threat hunts and related Investigations in your environment.
Health	View information about the health of your endpoints, networks and appliances.
Resources	View announcements and create summary reports.
Settings	Create, edit, and view user and organization profile information.
Contact Us	View contact details for your Managed Defense Consultant (MDC) or **Google Cloud Customer Care** **(https://cloud.google.com/support-hub)**.

The Managed Defense Portal menu options vary based on your Managed Defense subscription tier and service type, user account, and access privileges.

Managed Defense Portal authentication

You must use federated access to sign in to your Managed Defense Portal account. To configure access, see **Federated access for the Managed Defense Portal (https://docs.mandiant.com/home/md-federated-access)**.

API

Managed Defense offers technology integrations to its portal through an API to pull information related to published Investigation Reports. Any integration between the API and your systems is your responsibility to maintain. If you would like to integrate with this API, please reach out to your MDC for the appropriate documentation and access keys.

For more information, refer to the **Managed Defense API (https://docs.mandiant.com/home/managed-defense-api)** documentation.
