

INTEGRATING WITH THREATQUOTIENT THREATQ

The integration of Mandiant Advantage Threat Intelligence (MA-TI) with ThreatQuotient's ThreatQ platform allows you to make threat intelligence actionable, which improves the efficiency and effectiveness of your security operations programs.

The primary ThreatQ and Mandiant Advantage Threat Intelligence Integration features are:

- Making threat intelligence contextual, tailored, and actionable to the security mission
- Providing visibility beyond the typical attack lifecycle by adding context and priority to global threats with the MITRE ATT&CK framework
- Improving the ability to prioritize and remediate security alerts and patch security vulnerabilities
- Delivering granular reports to help align security programs and resources against the most likely threats and actors
- Providing user-configurable intelligence to eliminate noise at the integration level

Installation

To download & see additional details on installation, visit the app page: <https://marketplace.threatq.com/>.

For general information on adding apps to ThreatQuotient , refer to your ThreatQuotient documentation.
