

WORKING WITH MONITOR GROUPS

You can group Monitors together into a Monitor group, which helps you to organize and administer Monitors. For example, you can create a Monitor group that is built for a particular use case (e.g., DLP) or that delineates responsibility (e.g., Network Engineering Group). With a Monitor group, you can easily add multiple Monitors for notification.

Adding a Monitor Group

1. Go to **AEDA > Groups**.
2. Click **Add Monitor Group**.
3. Provide a *Name* for the group.
4. Drag Monitors from the **Unassigned Monitors** or **Assigned Monitors** pane into the **Current Monitors** pane.

Add a Monitor Group

Monitors that appear in the Assigned Monitors pane belong to another Monitor Group. Monitors can belong to multiple groups.

5. Click **Submit**.

Editing a Monitor Group

1. Go to **AEDA > Groups**.
2. Locate the Monitor Group you want to edit.
3. Click **Edit** .
4. Make changes as needed.
5. Click **Submit**.
