

## ACCESSING VALIDATION RESOURCES

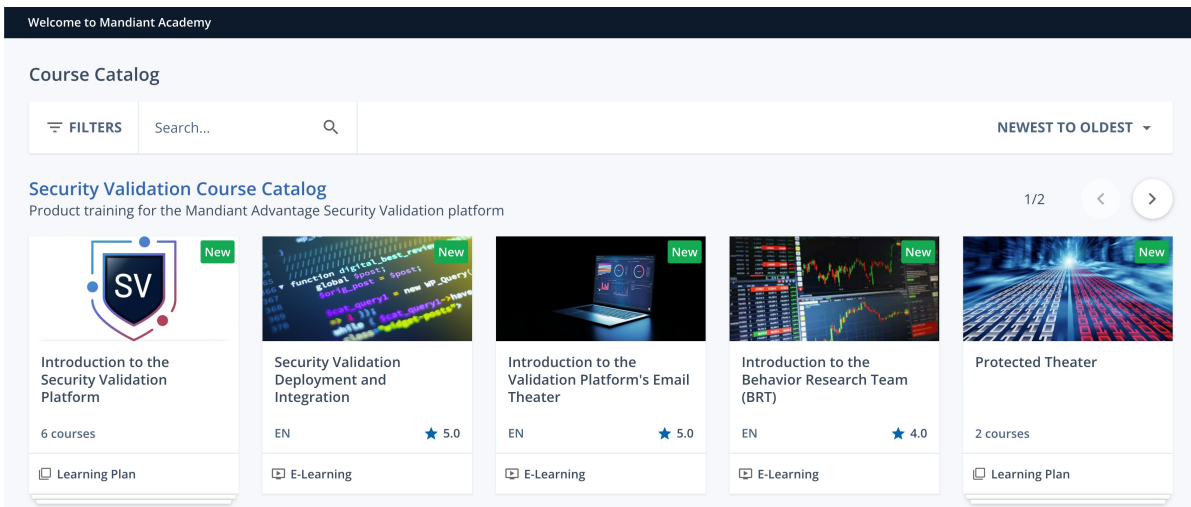

After the purchase of the Validation Platform is finalized, you'll be ready to get started. You will have several resources available to you:

- Documentation Portal: <https://docs.mandiant.com> (<https://docs.mandiant.com/>)
- Mandiant Training Portal: <https://academy.mandiant.com> (<https://academy.mandiant.com/>)
- Support / Case Access: **Support** (<https://docs.mandiant.com/home/mandiant-support-cases>)
- Dedicated Technical Security Consultant (TSC)

A kickoff meeting will be scheduled with your TSC shortly after procurement. During the kickoff your TSC will go over the Validation Platform deployment, your primary use cases, and scheduling. They will also go over the other resources with you.

If you want to get started before the kickoff meeting, you can request access to the first two resources on your own. To do so, contact **Support** (<https://docs.mandiant.com/home/mandiant-support-cases>).

Security Validation training has self-paced courses, access to recorded webinars, and allows you to register for an introduction to the Validation Platform bootcamp.

The screenshot shows the 'Welcome to Mandiant Academy' interface. The main section is titled 'Course Catalog' and includes a search bar and a 'NEWEST TO OLDEST' sort option. Below this is the 'Security Validation Course Catalog' section, which is described as 'Product training for the Mandiant Advantage Security Validation platform'. It features five course cards, each marked as 'New':

- Introduction to the Security Validation Platform**: 6 courses, includes a Learning Plan icon.
- Security Validation Deployment and Integration**: EN, 5.0 rating, includes an E-Learning icon.
- Introduction to the Validation Platform's Email Theater**: EN, 5.0 rating, includes an E-Learning icon.
- Introduction to the Behavior Research Team (BRT)**: EN, 4.0 rating, includes an E-Learning icon.
- Protected Theater**: 2 courses, includes a Learning Plan icon.
