

PRINT THE JOB RESULTS

This Job Results page can be printed using your browser's print function. This can be helpful if you are working with someone who doesn't have access to the platform. When you print the Job results, only what is currently displayed will be included. So, if you have sections collapsed, the details in the collapsed section will not display.

The printed version uses a white background and adjusts some sections of the layout to make the output easier to read.

Monitor: TCP Scan of Common Ports (Job 11932)
