

DELETE JOBS

The ability to delete Jobs is controlled by User Group permissions. By default, no users have the ability to delete Jobs. Administrators must manually update a group's permissions to allow this.

Delete an individual Job

To delete a Job, click the delete icon (shown in the screenshot below) next to the applicable Job.

Deleting a Job

Delete multiple Jobs

1. Using standard keyboard shortcuts, select one or more Jobs. A count of selected Jobs appears next to the Actions menu.

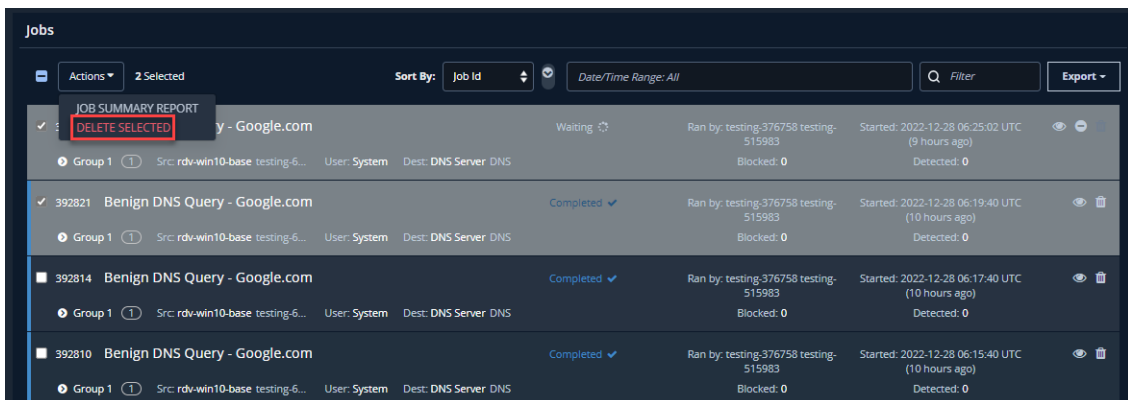

You can select Jobs across pages. This includes selecting a Job on one page, using the page arrows to advance to another page, and then Shift +clicking on a Job to select all Jobs in between.
