

ACTOR INSTALLER FILES

The Actor Installer File Library is a repository for Validation Platform Endpoint Actor installation files. Mandiant Advantage Security Validation provides installation files for the following operating systems:

- Linux
- Windows 32-bit
- Windows 64-bit
- MacOS

Only install files that correspond to the Director's current version appear in the library. The Windows files (32-bit and 64-bit versions) are also available from the Endpoint File Library.

| Filename | OS | MD5 | Timestamp | Action |
|----------|----|-----|-----------|--------|
