

SECURITY VALIDATION ICONS

There are some icons you will see as you go through the Effectiveness Validation Process and add new security technology definitions. You'll also see several of these icons on the Gauges and when reviewing Jobs.

Icons used on Effectiveness Validation Process Pages

Icon	Meaning	Location	Information
	Unknown Security Technology	Gauge Details section of the Gauge Page	Represents Actions that were not related to a defined Security Technology
	Security Devices	Job Events table, column header	Displays the security technology icons, the No Sec Tech icon provided icon, or the Add Security Technology icon
	No available Security Technology icon	Job Events table, Security Devices column	Displays when a security technology is defined but there is not a security technology icon available
	Add Security Technology	Job Events table, Security Devices column; Process Events Actions column	Displays when no security technology is identified and takes you to the Create/View Security Technology View
	Security Technology (Add detection Info)	Create/View Security Technology view	Displays next to each data field; when clicked it adds the field information into the user-defined Detection definition
	Prevention	Create/View Security Technology view	Displays next to each data field; when clicked it adds the field information into the user-defined Prevention definition
	View Job Details	Process Job Events; Process Job Actions	Launches the Job Results page

Icon	Meaning	Location	Information
	Expand / collapse Raw Event info		
	Expand / collapse Filter	Top, right corner
