

GETTING STARTED WITH ATTACK SURFACE MANAGEMENT

If you're a new subscriber, see [Attack Surface Management Onboarding](https://docs.mandiant.com/home/asm-onboarding) (<https://docs.mandiant.com/home/asm-onboarding>) for a quick overview of your first steps. As a new Mandiant Advantage Attack Surface Management (MA-ASM) customer, there are several recommended steps as you get started.

To be successful, there are some core concepts you'll need to understand:

- [Understanding ASM Seeds](https://docs.mandiant.com/home/asm-seeds) (<https://docs.mandiant.com/home/asm-seeds>)
- [Understanding Technologies](https://docs.mandiant.com/home/asm-technologies) (<https://docs.mandiant.com/home/asm-technologies>)

The basic onboarding process includes:

- [Creating a Project](https://docs.mandiant.com/home/asm-projects) (<https://docs.mandiant.com/home/asm-projects>)
- [Creating Collections using Workflows](https://docs.mandiant.com/home/asm-create-a-collection) (<https://docs.mandiant.com/home/asm-create-a-collection>)
- [Collections Overview](https://docs.mandiant.com/home/asm-customize-collections) (<https://docs.mandiant.com/home/asm-customize-collections>)
- [Reviewing Entities](https://docs.mandiant.com/home/asm-entities) (<https://docs.mandiant.com/home/asm-entities>)
- [Reviewing Issues](https://docs.mandiant.com/home/asm-issues) (<https://docs.mandiant.com/home/asm-issues>)

You'll also want to provide access to your Projects & Collections to others:

- [Adding users to your Projects and creating Groups](https://docs.mandiant.com/home/asm-project-membership) (<https://docs.mandiant.com/home/asm-project-membership>)
- [Assigning roles within your Collections](https://docs.mandiant.com/home/asm-assign-roles-within-a-collection) (<https://docs.mandiant.com/home/asm-assign-roles-within-a-collection>)

You may want to send information from MA-ASM to other systems, or from other systems to MA-ASM. You can do that using a variety of integration options:

- [Mandiant Advantage for Splunk](https://docs.mandiant.com/home/ma-mandiant-advantage-for-splunk) (<https://docs.mandiant.com/home/ma-mandiant-advantage-for-splunk>)
- [Inbound MA-ASM Integrations](https://docs.mandiant.com/home/asm-inbound-integrations) (<https://docs.mandiant.com/home/asm-inbound-integrations>)
- [Outbound MA-ASM Integrations](https://docs.mandiant.com/home/asm-outbound-integrations) (<https://docs.mandiant.com/home/asm-outbound-integrations>)
- [Notifications](https://docs.mandiant.com/home/asm-notifications) (<https://docs.mandiant.com/home/asm-notifications>)
