

MANAGED SERVICES

Mandiant Managed Services are expert-driven subscriptions that help defend your business against the latest cyber threats.

The Mandiant Managed Services offers two subscriptions:

1. Mandiant Managed Defense
2. Mandiant Threat Defense

Mandiant Managed Defense

Mandiant Managed Defense (<https://docs.mandiant.com/home/managed-defense>) is a managed detection and response (MDR) service where Mandiant experts monitor your endpoint, network, cloud, email, and operational security technologies with human-led analysis and response. Mandiant Managed Defense also includes proactive threat hunting using frontline intelligence to detect evidence of attacks in your environment that other security technologies may have missed.

Mandiant Threat Defense

Mandiant Threat Defense (<https://docs.mandiant.com/home/mandiant-threat-defense>) is a threat detection, investigation, and response (TDIR) service where Mandiant experts monitor and respond to security detections in your Google Security Operations (SecOps) platform. Combining the power of AI with the expertise of Mandiant, our team rapidly converts intelligence from incident response engagements into an advanced detection pipeline of curated detection content. Mandiant experts efficiently identify and prioritize critical security events, enabling rapid response and faster threat mitigation.
