

THREAT INTELLIGENCE

Mandiant Advantage Threat Intelligence provides customers with intelligence on who is most likely going to attack them, how they are going to attack, and what tools they will use. This allows customers to prepare their defenses against an imminent attack.

Understand Active Threats to You and Your Peers

- Learn which active threat actors targeting your industry
- Understand which TTPs are being used against organizations like yours in real-time
- Leverage over 200,000 hours in IR engagements per year for visibility into all aspects of an attack including social engineering

Prioritize Resources to Address TTPs that Matter

- Understand how threat actors are targeting your and adjust your defenses accordingly
- Prioritize vulnerability patching based on the CVEs currently being exploited by groups targeting your industry

Operationalize Threat Intelligence through Mandiant Advantage

- Ingest threat intelligence into existing security tools
Realize quicker ROI by pulling real-time threat intelligence into security tools for more efficient security
- Build investigations across your security stack using threat intelligence

Currently, the Mandiant Advantage Threat Intelligence family has several subscriptions available. This includes:

- Security Operations
- **Digital Threat Monitoring** (<https://docs.mandiant.com/home/dtm-digital-threat-monitoring>)
- Fusion
- Vulnerability Updates
- Executive Intelligence Briefings
