

INTEGRATIONS

The Advantage Platform allows you to automate Mandiant expertise and intelligence so you can prioritize effort and increase capacity to detect and respond faster to attacks - think of it as a virtual extension of your team. Many of the Mandiant Advantage products can integrate with other cyber security, increasing your effectiveness even further.

For information about the products' various Integration options, see the following pages:

- **ASM Inbound Integrations** (<https://docs.mandiant.com/home/asm-inbound-integrations>)
- **ASM Outbound Integrations** (<https://docs.mandiant.com/home/asm-outbound-integrations>)
- **Security Validation Integrations** (<https://docs.mandiant.com/home/msv-integrations>)
- **Threat Intel Integrations** (<https://docs.mandiant.com/home/mati-threat-intelligence-integrations>)

For information about Mandiant Advantage's Splunk Integration, which can be used with ASM, Security Validation, and Threat Intelligence see **Mandiant Advantage for Splunk** (<https://docs.mandiant.com/home/ma-mandiant-advantage-for-splunk>).
