

CREATING A .CSV OF ALL ACTIONS

You can create a .csv of all Actions in the platform. To do so, add the following to the platform's url:

```
/manage_sims/actions_export.csv
```

ex: `https://<DirectorIP>/manage_sims/actions_export.csv`

The csv includes the following fields:

- VID
- Name
- Description
- Action Type
- Validation Tags
- User Tags
- Run As Tags
- Source/Destination Tags
- OS/Platform Tags
- Control Tags
- Mitre Mitigation
- NIST Control
- Notes
- Version
- Metadata Version
- Require Endpoint
- HTTP?
- Hex?
- Attack Vector
- Attacker
- Location
- Behavior Type
- Covert
- OS/Platform
- Stage of Attack
