

EDITING TAAM DASHBOARD PANEL DETAILS

You can edit the details for the TAAM Dashboard panels to customize the displayed results.

- **Readiness: Malware Families**
- **MITRE ATT&CK: Tactic Radar**
- **Control: Prevented, Detected, Missed & Total Tests**
- **Readiness: Threat Actors**
- **Trending: Block Rate**

To Edit the Readiness: Malware Families Panel

1. Go to **Analyze > TAAM Dashboard**.
2. Click **Edit**  for the Readiness: Malware Families panel.
3. Click in the **Panel Title** field and enter text as desired.
4. Select a time range type from the drop-down list and then configure the time range as desired.
 - Select **Time Until Now (Relative)**, type a number for the time range in the **Last** field, and select the desired time range type (minutes, hours, days, weeks, months, years).
 - Select **Custom Range (Absolute)**, click **Change**, use the calendar to select the starting date and times for your desired range, and click **Apply**.
5. Enter the **Number of results**.
6. Select either **Threat Intel integrations** or **Action Malware Tags** for **Show Results From**.
7. Select one of the five **Sort Results By** options.
8. Optional: Select whether the panel includes Actions using the Global Setting or not. Any user can select whether to include Actions using the **Global Setting**, from **All Evaluations**, **Priority Evaluations**, or **Non-Priority Evaluations**.
9. Click **Update**.

To Edit the MITRE ATT&CK: Tactic Radar Panel

1. Go to **Analyze > TAAM Dashboard**.
2. Click **Edit**  for the MITRE ATT&CK: Tactic Radar panel.
3. Click in the **Panel Title** field and enter text as desired.
4. Select a time range type from the drop-down list and then configure the time range as desired.
 - Select **Time Until Now (Relative)**, type a number for the time range in the **Last** field, and select the desired time range type (minutes, hours, days, weeks, months, years).
 - Select **Custom Range (Absolute)**, click **Change**, use the calendar to select the starting date and times for your desired range, and click **Apply**.
5. Select **Blocked Percentage** or **Total Actions Run** as desired.

If you choose Total Actions Run, changes to the Desired block rate have no impact. Your chart no longer has green and red sections, it is entirely yellow.

6. Enter the **Desired block rate**.
7. Optional: Select whether the panel includes Actions using the Global Setting or not. Any user can select whether to include Actions using the **Global Setting**, from **All Evaluations**, **Priority Evaluations**, or **Non-Priority Evaluations**.
8. Click **Update**.

To Edit the Control: Prevented, Detected, Missed & Total Tests Panel

1. Go to **Analyze > TAAM Dashboard**.

2. Click **Edit**  for the Control Prevented, Detected, Missed & Total Tests panel.
3. Click in the **Panel Title** field and enter text as desired.
4. Select a time range type from the drop-down list and then configure the time range as desired.
 - Select **Time Until Now (Relative)**, type a number for the time range in the **Last** field, and select the desired time range type (minutes, hours, days, weeks, months, years).
 - Select **Custom Range (Absolute)**, click **Change**, use the calendar to select the starting date and times for your desired range, and click **Apply**.
5. Optional: Select whether the panel includes Actions using the Global Setting or not. Any user can select whether to include Actions using the **Global Setting**, from **All Evaluations**, **Priority Evaluations**, or **Non-Priority Evaluations**.
6. Click **Update**.

To Edit the Readiness: Threat Actors Panel

1. Go to **Analyze > TAAM Dashboard**.
2. Click **Edit**  for the Readiness: Threat Actors panel.
3. Click in the **Panel Title** field and enter text as desired.
4. Select a time range type from the drop-down list and then configure the time range as desired.
 - Select **Time Until Now (Relative)**, type a number for the time range in the **Last** field, and select the desired time range type (minutes, hours, days, weeks, months, years).
 - Select **Custom Range (Absolute)**, click **Change**, use the calendar to select the starting date and times for your desired range, and click **Apply**.
5. Enter the **Number of results**.
6. Select either **Important Threat Actors** or **All Threat Actors** for **Show Results From**.
7. Select one of the five **Sort Results By** options.
8. Optional: Select whether the panel includes Actions using the Global Setting or not. Any user can select whether to include Actions using the **Global Setting**, from **All Evaluations**, **Priority Evaluations**, or **Non-Priority Evaluations**.
9. Click **Update**.

To Edit the Trending: Block Rate Panel

1. Go to **Analyze > TAAM Dashboard**.
2. Click **Edit**  for the Control Prevented, Detected, Missed & Total Tests panel.
3. Click in the **Panel Title** field and enter text as desired.
4. Select a time range type from the drop-down list and then configure the time range as desired.
 - Select **Time Until Now (Relative)**, type a number for the time range in the **Last** field, and select the desired time range type (minutes, hours, days, weeks, months, years).
 - Select **Custom Range (Absolute)**, click **Change**, use the calendar to select the starting date and times for your desired range, and click **Apply**.
5. Enter the **Desired block rate**.
6. Optional: Select whether the panel includes Actions using the Global Setting or not. Any user can select whether to include Actions using the **Global Setting**, from **All Evaluations**, **Priority Evaluations**, or **Non-Priority Evaluations**.
7. Click **Update**.
