

## LOGIN SETTINGS

The Login Settings page is where you can configure a custom login screen that appears before users can sign in. There's no character limit for the message you include, but the logo image can be no larger than 800 x 400 pixels and must be a valid image file.

This can be helpful if you need a way to communicate your company's software use policies or other important messaging around using the Validation Platform.

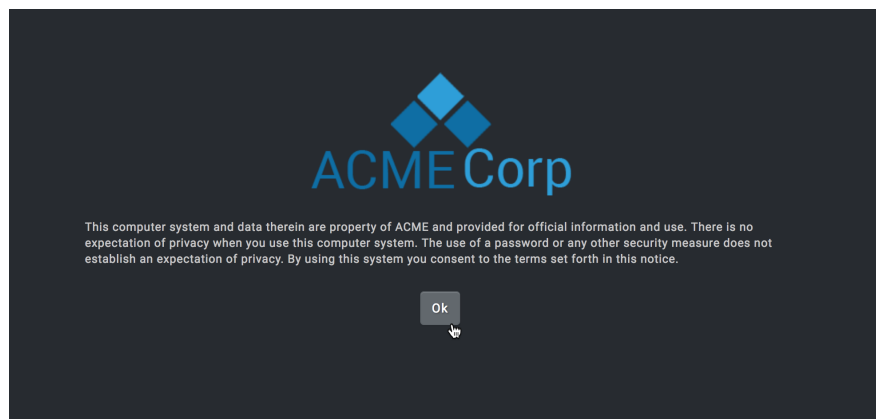

Login Settings

### To update Login Settings

1. Go to **Settings > Director Settings**. The Systems Settings page opens.
2. Click **Login Settings**.
3. Enter your message and upload an image.
4. Select **True** for Enabled.
5. Click **Update Login Settings**.

After you update your login settings with a logo image, you can easily remove or download the image from the same page.
