

PASSWORD SETTINGS

After you have installed the Director, you can create user accounts for additional staff. All user account management functions are processed via the Users Settings page in the Director.

See [Security Validation User Groups and Permissions \(https://docs.mandiant.com/home/msv-user-groups-and-permissions\)](https://docs.mandiant.com/home/msv-user-groups-and-permissions) for setting and viewing user group permissions. See [Managing User Accounts \(https://docs.mandiant.com/home/msv-managing-user-accounts\)](https://docs.mandiant.com/home/msv-managing-user-accounts) for information on creating and updating accounts.

Password Settings

The platform has minimum password requirements. The admin can modify these, but by default, they are:

- Minimum length: 8
- Numerical characters required: 2
- Special characters required: 2
- Requires upper and lower case characters

Change Password Settings

1. Launch the Director and sign in.
2. Go to **Settings > User Settings**. The User Settings page opens.
3. Click **Users**.
4. Click **Password Settings**.
5. Update the Password Settings and click **Submit**.
