

ADD EMAIL ACTIONS

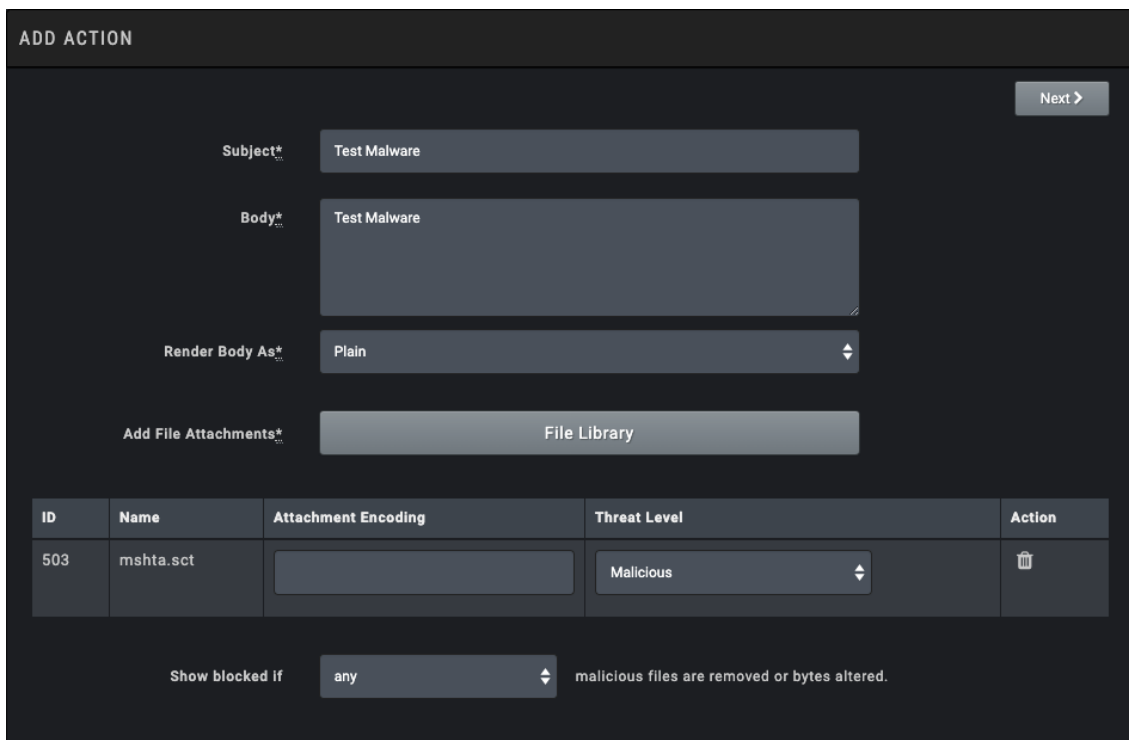

Email Actions are available as part of the optional Email Theater module. Before you can run Email Actions, you must configure at least one Email Profile and at least one Email Rule. For more information, refer to the *Email Theater Guide*. Use the following procedure to create an Email Action.

You can also enter this workflow from the **Library > Files >  Create Action**, which allows you to create an Email Action from a single file.

CREATING AN EMAIL ACTION

1. Go to **Library > Actions**.
2. Click **Add Action** and select Email. The following form appears.

ADD ACTION Next >

Subject*

Body*

Render Body As*

Add File Attachments*

ID	Name	Attachment Encoding	Threat Level	Action
503	mshsa.sct	<input type="text"/>	Malicious	

Show blocked if malicious files are removed or bytes altered.

Email Action form

3. Add the following information for the Email Action.
 - Subject** - Specify the subject line for the email generated by this Action.
 - Body** - Specify the content for the body of the email generated by this Action.
 - Render Body As** - Select either **Plain** or **HTML**.
4. To include a file attachment, click **File Library**.
The following form appears. Select any files that you want to attach to the email.

Add File Attachments

FILE ATTACHMENTS

	ID	Restrictions	File Name	File Size
<input type="checkbox"/>	23	None	Customer_PII_Data.csv	13.8 KB
<input checked="" type="checkbox"/>	24	Restricted Malicious	InceptionFrameworkAndroidMalware.apk	1.24 MB
<input type="checkbox"/>	25	Restricted Malicious	InceptionFrameworkBlackberryMalware.jar	68.3 KB
<input type="checkbox"/>	26	Restricted Malicious	loki.exe	184 KB
<input type="checkbox"/>	27	Restricted Malicious	InceptionFrameworkRTFAttachment.rtf	2.89 MB
<input type="checkbox"/>	28	Restricted Malicious	harsh02.exe	1.03 MB
<input type="checkbox"/>	29	Restricted Malicious	InceptionFrameworkIOSMalware.deb	1.18 MB

<input type="checkbox"/>	31	Restricted Malicious	Ramnit.exe	326 KB
<input type="checkbox"/>	32	Restricted Malicious	zbot	635 KB
<input type="checkbox"/>	33	Restricted Malicious	CryptXXX.dll	172 KB
<input type="checkbox"/>	34	Restricted Malicious	a8b05325.exe	93 KB
<input type="checkbox"/>	35	Restricted Malicious	ACH_transfer5228.doc	194 KB

Close Submit

Add file from File Library

5. Click **Submit**. The file is attached to your Email Action, as shown in the following screenshot.

ADD ACTION

< Previous Next >

Subject* Malicious Content - Link

Body* Contains a link to a malicious file. Do not click on!

Render Body As* HTML

Add File Attachments* File Library

ID	Name	Attachment Encoding	Threat Level	Action
24	InceptionFrameworkAndroidMalware.apk		Malicious	

Show blocked if any malicious files are removed or bytes altered.

Email Action with malicious file attachment

- Specify the Threat Level for this file: **Benign** or **Malicious**. This value specifies whether the file is expected to be blocked or not.
- Specify how blocking is determined by setting the following field:
Show blocked if [any|all] malicious files are removed or bytes altered
- Click **Next**.
- Complete the form for the Email Action.
