

## UNINSTALLING ACTORS

Each of the Actor installers includes a script that lets you completely uninstall the Actor and all its dependencies.

### Uninstall a Linux or Mac Actor

1. Use SSH to open a command line on the system where you want to uninstall the Actor.
2. Run the uninstall script (modify the path if you changed the install location). The following message appears:

```
WARNING THIS WILL COMPLETELY REMOVE ACTOR AND ALL DATA
```

This command is destructive. No CLI flags are supplied and you must respond to the prompts to complete the uninstall.

- Linux Actors

```
$ sudo /opt/apps/verodin/node/node/scripts/verodin_uninstaller
```

- Mac Actors

```
$ sudo /Users/Shared/Verodin/node/node/scripts/verodin_uninstall
```

3. Respond **Yes** to the following prompt to proceed with the uninstall:

```
Are you sure you want to remove Actor and all data? (yes/no):
```

### Uninstall a Windows Actor

There are several methods to remove the Windows Actor completely from the operating system:

- As an administrator, run the following command:

```
"C:\Program Files\Verodin\node\windows\Uninstall.bat"
```

- As an administrator, uninstall through MSI by performing the following commands:

- Change directory ( `CD` ) to the location of the installer.exe file.
- Extract the MSI (a progress bar is displayed and a folder is created, named similar to **007FF1C**)

```
VerodinEndpoint-4.8.3.0.exe /extract:"C:\Users\username\Downloads"
```

- Change directory ( `CD` ) to the newly created folder.
- Run the uninstall command:

```
msiexec.exe /x verodin_endpoint.exe /uninstall /qn
```

- From the Control Panel, choose **Programs > Uninstall a program**, and select the Verodin Endpoint Actor program in the list. To remove the program, follow the prompts.

The Actor remains listed in the Director until you remove it.

### Remove the Actor from the Director

1. Log in to the Director.
2. Go to **Environment > Actors**.
3. Locate the Actor in either the Network or Endpoint Actors table.
4. Open the Actions menu next to the Actor and then click **Delete**.
5. Click **OK** to complete the deletion of the Actor.
