

## UNINSTALLING THE DIRECTOR

The Director installer includes a script that will completely uninstall the Director and all its dependencies.

### TO UNINSTALL THE DIRECTOR

1. Use ssh to open a command line on the system where you want to uninstall the Director.
2. Run the verodin uninstall script (modify the path if you changed the install location)

```
$ sudo /opt/apps/verodin/planner/bin/remove_planner.rb
```

The following message will appear:

```
WARNING THIS WILL COMPLETELY REMOVE DIRECTOR AND ALL DATA
```

**IMPORTANT:** This is an extremely destructive command. No cli flags are supplied and you must respond to the prompts to complete the uninstall.

3. Respond **Yes** to the following prompt to proceed with the uninstall:

```
Are you sure you want to remove director and all data? (yes/no):
```
