

ADMINISTRATION

Security Validation Admins use the Director Settings pages to configure the platform. These setting pages include:

- **Actor Settings** (<https://docs.mandiant.com/home/msv-settings-actors>): Manage Actor Communications
- **Advanced Settings** (<https://docs.mandiant.com/home/msv-advanced-settings>)
- **Audit Log Settings** (<https://docs.mandiant.com/home/msv-audit-log-settings>)
- **Authentication Settings** (<https://docs.mandiant.com/home/msv-authentication-settings>): Manage how users sign on (MSV only)
- **Block Rules Settings** (<https://docs.mandiant.com/home/msv-block-rules-settings-4163>)
- **Captive IOC Actions Settings** (<https://docs.mandiant.com/home/msv-captive-ioc-actions-settings>)
- **Content Settings** (<https://docs.mandiant.com/home/msv-content-settings>): Manage your security content
- **DNS Settings** (<https://docs.mandiant.com/home/msv-dns-servers-settings>)
- **Email Settings** (<https://docs.mandiant.com/home/msv-email-settings>)
- **Email Actions Settings** (<https://docs.mandiant.com/home/msv-email-actions-settings>): Managing Profiles & Rules required to run Email Actions
- **Integrations Settings** (<https://docs.mandiant.com/home/msv-managing-integrations>): Settings specific to working with your Integrations to get appropriate event matching
- **Login Settings** (<https://docs.mandiant.com/home/msv-login-settings>)
- **Network Settings** (<https://docs.mandiant.com/home/msv-applying-network-settings>) (MSV only)
- **NTP Servers Settings** (<https://docs.mandiant.com/home/msv-ntp-servers-settings>)
- **Operational Status Settings** (<https://docs.mandiant.com/home/msv-operational-status-settings>)
- **Pass/Fail Settings** (<https://docs.mandiant.com/home/msv-passfail-rules>)
- **Proxy Settings** (<https://docs.mandiant.com/home/msv-proxy-rules>)
- **Protected Theater Settings** (<https://docs.mandiant.com/home/msv-protected-theater-settings>)
- **Security Technologies Settings** (<https://docs.mandiant.com/home/msv-security-technologies-settings>)
- **SSL Settings** (<https://docs.mandiant.com/home/msv-ssl-settings>) (MSV only)
- **Support Settings** (<https://docs.mandiant.com/home/msv-support-settings>): Collecting logs and checking System Status
- **System Settings** (<https://docs.mandiant.com/home/msv-system-settings>)
- **Tags Settings** (<https://docs.mandiant.com/home/msv-tags>)
- **User Groups Settings** (<https://docs.mandiant.com/home/msv-user-groups-and-permissions>)
- **User Policy Settings** (<https://docs.mandiant.com/home/msv-user-policy>)
- **Users Settings** (<https://docs.mandiant.com/home/msv-users-settings>)
- **Virtual Addresses Settings** (<https://docs.mandiant.com/home/msv-virtual-addresses>)

There are addition settings that Security Validation Admins might need to do. This includes:

- **Adding Custom iptables Rules** (<https://docs.mandiant.com/home/msv-custom-iptables-rules>)
- **Adding a License** (<https://docs.mandiant.com/home/msv-adding-a-license>)
- **Adding Security Zones** (<https://docs.mandiant.com/home/msv-security-zones>)
- **Backing Up and Restoring Security Validation** (<https://docs.mandiant.com/home/msv-backing-up-and-restoring-the-platform>) (MSV only)
