

AUGUST 30, 2022 MANDIANT ADVANTAGE THREAT INTELLIGENCE RELEASE

New Versions

- Mandiant Advantage Digital Threat Monitoring (DTM) v1.65.6

New in this Release

- Update to Content View: Implemented HTML Rendered view in alert details page. This feature will help users understand the context of alerts quickly.
- Alerts opened by the user will be marked as READ on the alert list page without having to refresh the page.
- Added Entities tab in the alert details view to get clear context on discovered entities with corresponding Indicator Confidence (IC) Score and type.
- Made the following UI updates:
 - Update to Alert Stats: When using the search bar on the alert list page, the top alert count will reflect the results summary.
 - The "Flag for follow-up" option on the alert details page now includes a tooltip.
 - Enhanced the Matched keyword navigation in the alert details page.
 - Added matching indicator badges to the Characterization and Source Information sections in the alert details page.
 - Added click-to-copy for the Alert ID in the alert details page.
 - Removed the "Show More/Less" control for the alert type filter group. All alert type filters should be immediately visible and available to the user.
 - If more than 25 monitors are created, the first 25 will show in the Monitor filter group, with the rest being available by the "Show More/Less" control.
 - Disabled checkboxes and label text for alert filters with 0 items.

Bug Fixes

- Resolved misrepresentation of operator values in the UI while editing a monitor.
- The Channel Description will properly display for Telegram Message alerts.
