

SEPTEMBER 30, 2022 MANDIANT ADVANTAGE THREAT INTELLIGENCE RELEASE

New Versions

- Mandiant Advantage Threat Intel (MATI) v2.7.0
- Mandiant Advantage API (MAAPI) v1.31.17

New in this Release

- **MATI / MAAPI**
 - Added Mandiant Advantage (MA) **Custom Dashboards**, which gives customers the ability to build a platform-level dashboard for MA with widgets specific to their MA modules. Users can customize their dashboards and the data within dashboard widgets so they can view and filter the information and trends relevant to them.
 - Although not all widgets will have filtering available at initial launch, we will continue to iterate on widgets and build filters in as we investigate customer filtering use cases.
 - Improved the data sources behind the default dashboard on the MA home page. Chart names are now more descriptive, reflecting these data improvements; 'Malware Sightings' and 'Most Active Malware' widgets are replaced with the 'Top Malware by Indicators' and 'Top Actor by Indicators' widgets.
