

# OCTOBER 27, 2022 MANDIANT ADVANTAGE THREAT INTELLIGENCE RELEASE

## New Versions

- Mandiant Advantage Digital Threat Monitoring (DTM) v1.71.3

## New in this Release

- Added three new monitor templates:
  - **Netblock & Domains:** Looks for mentions of your netblocks and domains in listings for machine access and underground chat messages.
  - **Code Leaks:** Looks for evidence of leaked source code on Github.
  - **Deep & Dark Web:** Detects when attackers mention your brands, hosts, domains, etc. on the Deep & Dark web.
- Updated monitor templates with **HOW TO** guide.
- Improved visibility of Alert list by adding a **Switch to CARD or TABLE view** button to the card view.
- Completed the layout refinements for Alert list matching terms display, including addition of Indicator Confidence (IC) score.

## Bug Fixes

- Fixed 404 error that was displaying when users clicked **Create Monitor** in Alert view.
  - Note: This error only occurred when organizations did not have any alerts and monitors.
- Fixed issue that was preventing Sender Telegram label from displaying reliably.
- Removed caching from DTM Alerts search keyword. Keywords that were previously entered and no longer visible no longer impact search results.
- Fixed issue that was causing error when browsing Research Tools forum post via breadcrumbs in the Forum Browser tab.
