

HOW TO DELETE AN ASM PROJECT

You can delete an existing Mandiant Advantage Attack Surface Management (MA-ASM) project using the [Attack Surface Management \(ASM\) API](https://docs.mandiant.com/home/asm-api) (<https://docs.mandiant.com/home/asm-api>) if you are the owner of this project. If you need assistance with this process, contact [Support](https://docs.mandiant.com/home/mandiant-support-cases) (<https://docs.mandiant.com/home/mandiant-support-cases>).

- Only project owners have permission to delete an MA-ASM project.
- The base URL is expected to be **<https://asm-api.advantage.mandiant.com>**, unless otherwise specified.

1. Run the following curl command to get the project `uuid`.

```
curl --location --request GET 'https:\
//asm-api.advantage.mandiant.com/api/v1/projects' \
--header 'INTRIGUE_ACCESS_KEY: {{intrigue_access_key}}' \
--header 'INTRIGUE_SECRET_KEY: {{intrigue_secret_key}}'
```

2. Using this `uuid`, run the following command to delete the project.

```
curl --location --request DELETE 'https:\
//asm-api.advantage.mandiant.com/api/\
v1/projects/{{uuid}}' \
--header 'INTRIGUE_ACCESS_KEY: {{intrigue_access_key}}' \
--header 'INTRIGUE_SECRET_KEY: {{intrigue_secret_key}}'
```
