

APRIL 2022 ASM RELEASE

Better oversight on typosquats! - April 14, 2022

We pulled out Potential Typosquats into a separate tab within Domain Entity pages for easier access. No need to sort through the JSON to get an overview of suspicious domains.

Jira Integration is Here! - April 13, 2022

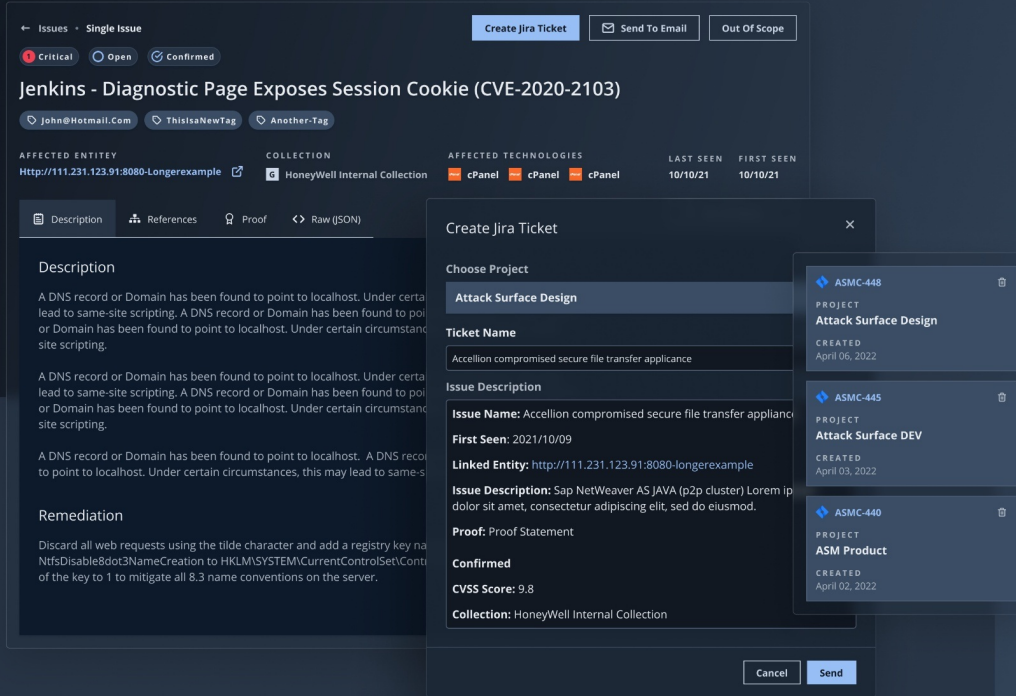

You can now create Jira tickets directly from Issues. No copy & paste necessary; Issue details are pre-populated within the Jira ticket.

How it Works:

1. Enable the integration
2. View an Issue and click the Create Jira Ticket button
3. Choose a Jira Project
4. Send to Jira

Jira Integration is Here!

You can now create Jira tickets directly from Issues.

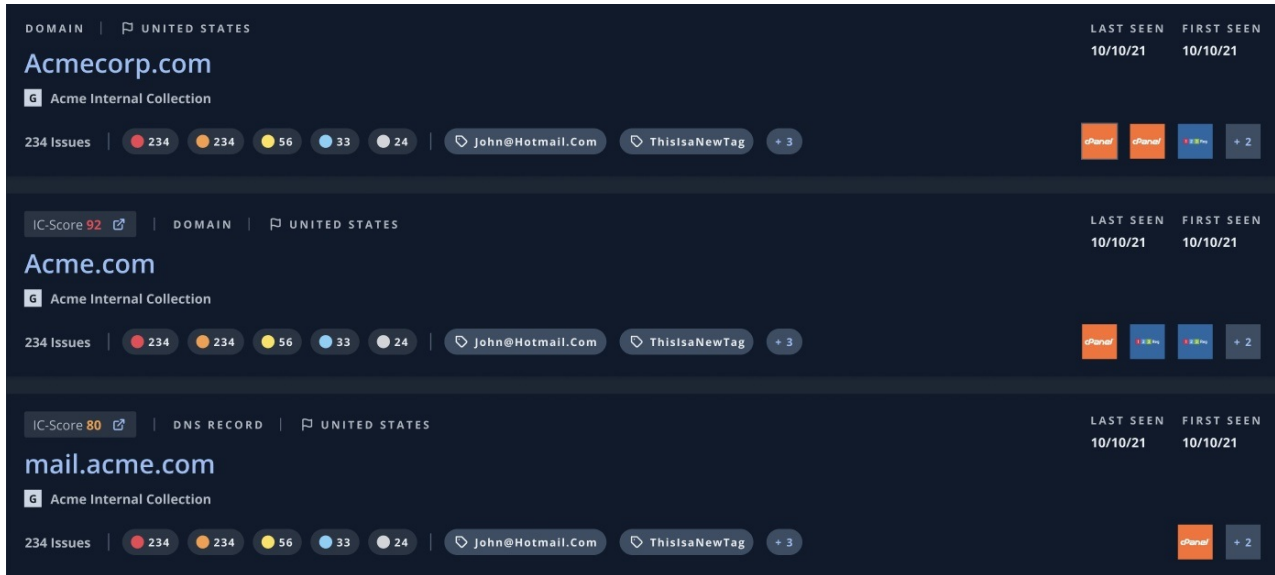

The screenshot displays the Mandiant interface for a single issue titled "Jenkins - Diagnostic Page Exposes Session Cookie (CVE-2020-2103)". The issue is categorized as "Critical" and "Open". A "Create Jira Ticket" button is visible in the top right. A modal window titled "Create Jira Ticket" is open, showing a "Choose Project" dropdown set to "Attack Surface Design". The "Ticket Name" field contains "Accellion compromised secure file transfer appliance". The "Issue Description" field is populated with the issue's details, including the "Issue Name", "First Seen" date (2021/10/09), "Linked Entity" (http://111.231.123.91:8080-longerexample), "Issue Description", "Proof" (Proof Statement), "Confirmed" status, "CVSS Score" (9.8), and "Collection" (HoneyWell Internal Collection). A list of projects is shown on the right, including "ASMC-448", "ASMC-445", and "ASMC-440". The modal has "Cancel" and "Send" buttons at the bottom.

UX Updates & Enhancements - April 12, 2022

We heard your feedback and will continue to make incremental changes; please continue to share your feedback.

Updates:

1. The **Entities page** (https://asm.advantage.mandiant.com/entities?table_view=true&search_string=type%3AUri%20last_seen_after%3Alast_refresh) now includes technology cards on the respective entity.
2. Copy raw JSON to your clipboard with one click on Issues and Entities.
3. New team members can be invited directly to a Collection and are automatically invited to the Project.

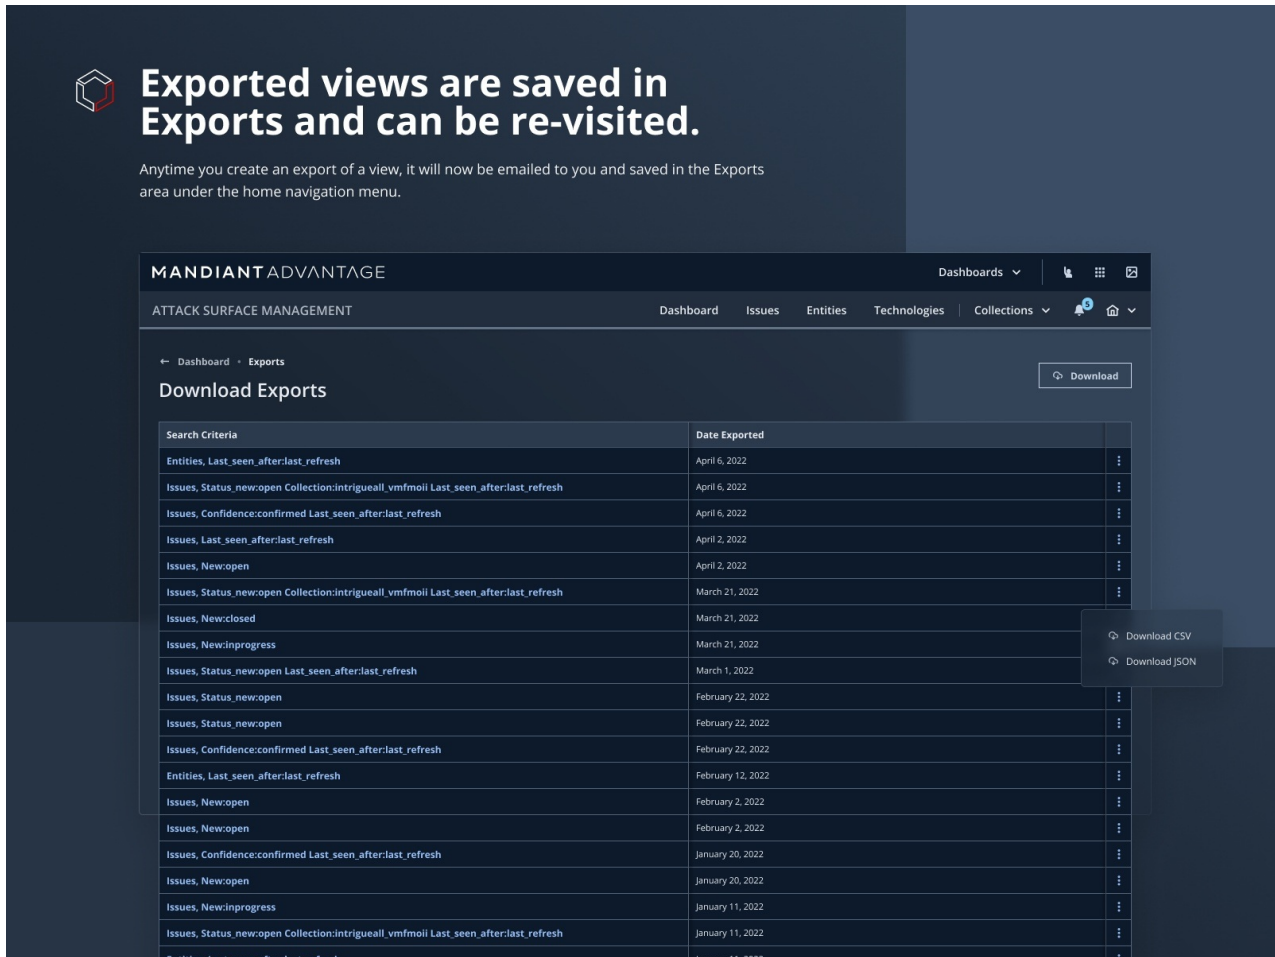

The screenshots show the following details for each domain view:

- Acmecorp.com:** IC-Score 92, 234 Issues, filters for John@Hotmail.Com and ThisIsaNewTag.
- Acme.com:** IC-Score 92, 234 Issues, filters for John@Hotmail.Com and ThisIsaNewTag.
- mail.acme.com:** IC-Score 80, 234 Issues, filters for John@Hotmail.Com and ThisIsaNewTag.

Exported views are saved in Exports and can be re-visited - April 6, 2022

Anytime you create an export of a view, it will now be emailed to you and saved in the Exports area under the home navigation menu.

Exported views are saved in Exports and can be re-visited.

Anytime you create an export of a view, it will now be emailed to you and saved in the Exports area under the home navigation menu.

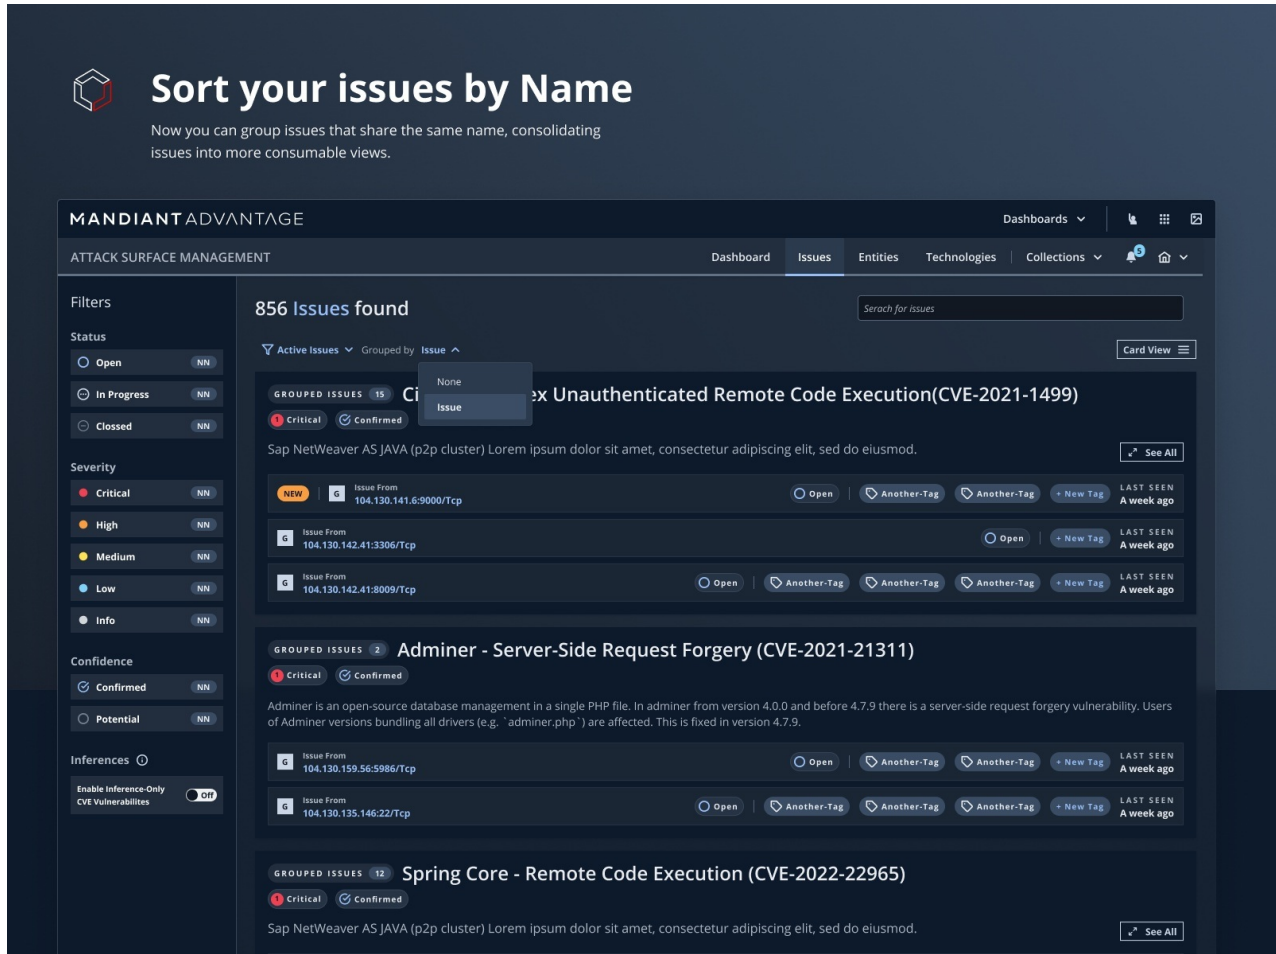

The screenshot shows the 'MANDIANT ADVANTAGE' interface with the 'Exports' section open. The 'Download Exports' table lists the following data:

Search Criteria	Date Exported
Entities, Last_seen_after:last_refresh	April 6, 2022
Issues, Status_new:open Collection:intrigueall_vmfmoi Last_seen_after:last_refresh	April 6, 2022
Issues, Confidence:confirmed Last_seen_after:last_refresh	April 6, 2022
Issues, Last_seen_after:last_refresh	April 2, 2022
Issues, New:open	April 2, 2022
Issues, Status_new:open Collection:intrigueall_vmfmoi Last_seen_after:last_refresh	March 21, 2022
Issues, New:closed	March 21, 2022
Issues, New:inprogress	March 21, 2022
Issues, Status_new:open Last_seen_after:last_refresh	March 1, 2022
Issues, Status_new:open	February 22, 2022
Issues, Status_new:open	February 22, 2022
Issues, Confidence:confirmed Last_seen_after:last_refresh	February 22, 2022
Entities, Last_seen_after:last_refresh	February 12, 2022

Issues, New:inprogress	January 11, 2022
Issues, Status_new:open Collection:intrigueall_vmfmoi Last_seen_after:last_refresh	January 11, 2022
Entities, Last_seen_after:last_refresh	January 11, 2022

Buttons for 'Download CSV' and 'Download JSON' are visible next to the table.

Sort your issues by Name - April 5, 2022

Now you can group issues that share the same name, consolidating issues into more consumable views.

The screenshot displays the Mandiant Advantage interface for Attack Surface Management. The main heading is "Sort your issues by Name" with a sub-heading: "Now you can group issues that share the same name, consolidating issues into more consumable views." The interface shows a navigation bar with "MANDIANT ADVANTAGE" and "ATTACK SURFACE MANAGEMENT". The "Issues" tab is active, showing "856 Issues found". A search bar is present with the placeholder "Search for issues". The left sidebar contains filters for Status (Open, In Progress, Closed), Severity (Critical, High, Medium, Low, Info), Confidence (Confirmed, Potential), and Inferences (Enable Inference-Only CVE Vulnerabilities). The main content area displays grouped issues. The first group is titled "C...x Unauthenticated Remote Code Execution (CVE-2021-1499)" and contains three issues from 104.130.141.6:9000/Tcp, 104.130.142.41:3306/Tcp, and 104.130.142.41:8009/Tcp. The second group is titled "Adminer - Server-Side Request Forgery (CVE-2021-21311)" and contains two issues from 104.130.159.56:5986/Tcp and 104.130.135.146:22/Tcp. The third group is titled "Spring Core - Remote Code Execution (CVE-2022-22965)" and contains one issue from Sap NetWeaver AS JAVA (p2p cluster). Each issue card includes a status indicator (e.g., "NEW", "G"), a severity level, and action buttons like "Open", "Another-Tag", and "New Tag".
