

DELETING MONITORS AND ALERTS

DTM Monitors and their associated Alerts can be deleted, with the option to delete just the Alerts or both the Monitor and the Alerts. For example, if you misconfigured the Monitor when you created it, you would probably update the Monitor but delete the Alerts.

 Individual alerts can be closed but not deleted entirely.

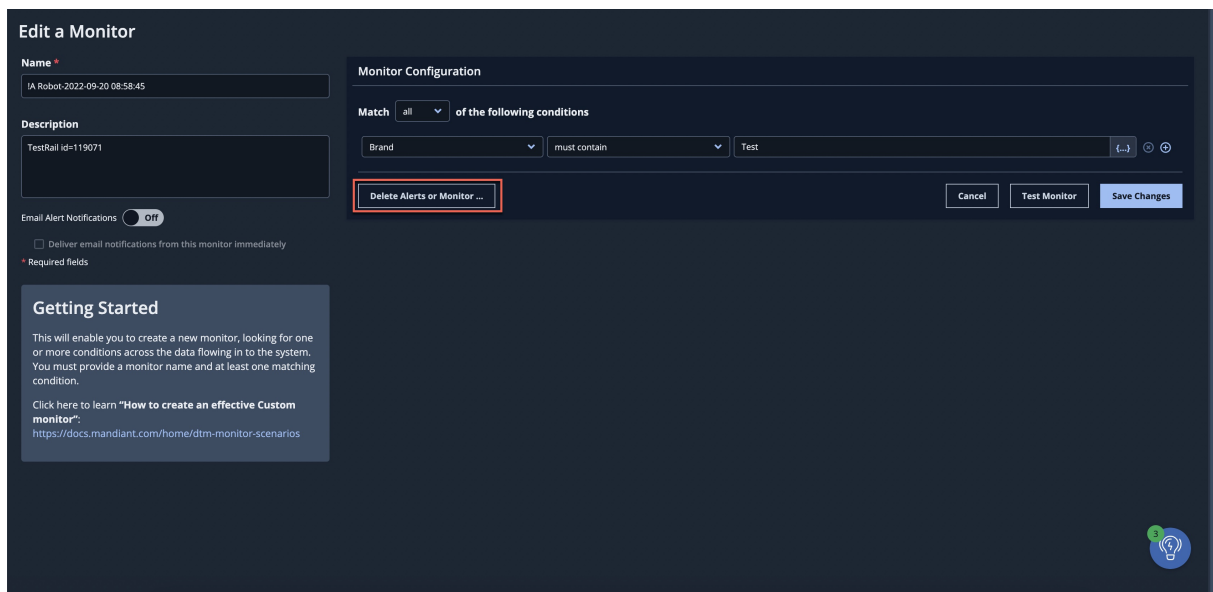

TO DELETE MONITORS OR ALERTS

1. Navigate to the Monitors tab.
2. Click on the Monitor you'd like to update.

Name	Date Modified	Date Created	Status
IA Robot-2022-09-20 08:58:45 TestRail id=119071	September 20, 2022 10:03 AM	September 20, 2022 09:58 AM	Inactive Monitor generated excessive alerts. Please fine tune the monitor and reactivate it.

TestRail id=119071

Email Alert Notifications **Off**
 Deliver email notifications from this monitor immediately

Monitor Configuration

Match **all** of the following conditions

Brand must contain Test

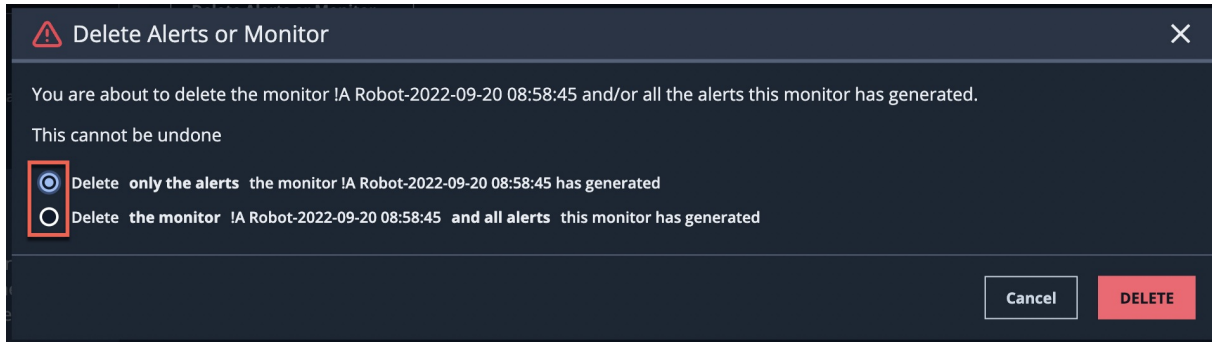

Delete Alerts or Monitor ... Cancel Test Monitor Save Changes

Getting Started

This will enable you to create a new monitor, looking for one or more conditions across the data flowing in to the system. You must provide a monitor name and at least one matching condition.

Click here to learn "How to create an effective Custom monitor":
<https://docs.mandiant.com/home/dtm-monitor-scenarios>

4. Choose whether you want to delete Alerts only or the Monitor *and* all associated Alerts.

5. Click **Delete**.
