

PRODUCT UPDATE 4.10.0.1 - JANUARY 30, 2023

If you're on a Mandiant Security Validation (MSV) release prior to 4.12.1.0, you may notice that a license expired watermark appears on the Network Map page on your Director.

This watermark is related to the software that renders the Network Map and does not affect functionality of the product.

Use one of the following options to fix the watermark issue permanently:

- Update to the latest release (4.12.1.0 or later) or migrate to Mandiant Advantage Security Validation (MA-SV).
- As an additional option, you can upgrade to release 4.12.0.1, which provides a fix for this issue and if you need more time to complete the update to 4.12.1.0 or later.

MSV 4.10.2.2 contains defect resolutions and a critical security fix. We recommend you apply that update as soon as reasonably possible. If you're unable to upgrade at this time, use the instructions in **Manage User Admin Account** (<https://docs.mandiant.com/home/manage-user-admin-account>) to either set a password for the account or disable the account if it's not being used.

The Mandiant Security Validation (MSV) team is pleased to announce version 4.10.0.1 of the MSV platform.

Bug Fixes

- Addressed an issue where the Jobs Status page was not loading in certain scenarios.

Important Installation Notes

- Minimum Director version 4.7.0.2 or higher is required to upgrade to version 4.10.0.1.
- Actor Compatibility. Actors must be upgraded to at least version 4.6.0.0 before updating their Director to 4.8.4.1.

To download documentation and software (appliance images, installers, and update packages) visit the **Validation Section of the Docs Portal** (<https://docs.mandiant.com/home/security-validation-on-prem-and-saas>). For full details on how to upgrade, see **Updating Security Validation Components** (<https://docs.mandiant.com/home/msv-system-updates>).
