

## RUN CONTENT FROM AN ASSESSMENT

This feature is released as a Public Preview.  
 Pre-GA products and features are available "as is" and might have limited support. For more information, please contact your TSC, your CSM, or go to [Support](https://docs.mandiant.com/home/mandiant-support-cases).  
<https://docs.mandiant.com/home/mandiant-support-cases>

As an administrator or power user, you can do the following from the Assessment Content tab:

- Run each of the included Actions, Evaluations, or Sequences individually from the Assessment
- View details about the content
- View the last run results of the content

The screenshot shows the 'Content' tab for an assessment named 'APT41 Q32022'. The interface includes a table with the following data:

VID	Name	Last Run	Last Run Status
A102-106	Application Vulnerability - APT41, Citrix CVE-2019-19781, Reconnaissance	2022-11-08 10:15:05 EST	✓ Completed
A102-107	Application Vulnerability - APT41, ManageEngine CVE-2020-10189, Exploitation with BITSAdmin Commands	2022-11-08 10:15:05 EST	✓ Completed
A102-108	Application Vulnerability - APT41, ManageEngine CVE-2020-10189, Exploitation with PowerShell Commands	2022-11-08 10:15:05 EST	✗ Errored
A102-111	Application Vulnerability - APT41, SharePoint CVE-2019-0604, Exploit Attempt	2022-11-08 10:15:05 EST	⚠ Cancelled
A150-448	Application Vulnerability - APT41, SharePoint CVE-2019-0604, Reconnaissance	---	---

VID	Name	Last Run	Last Run Status
S100-186	Malicious Activity Scenario: APT41 Activity using DUSTPAN and BEACON	2022-11-07 18:53:01 EST	✓ Completed
S100-187	Malicious Activity Scenario: APT41 Captures SMS Messages Using MESSAGECAP	2022-11-07 18:53:01 EST	✓ Completed

### Run Content from an Assessment

1. Go to **Library > Assessments** and open the Assessment which contains content you want to run.
2. In the relevant table row, select **Run** for the content item that you want to run.

- This step launches into the standard method of running the selected content type, prompting you to provide any needed run parameters (for example, Actors). After you make your selections, you can run the selected security content and capture the results.
- After Run now, you're taken to the Job Result.
- After submitting a scheduled job, you're taken Scheduled Jobs.
- After submitting a job by selecting actors by tags, you're taken to Bulk Jobs.
- For Evaluations and Sequences, you're not taken to the Environment Map to selected Actors.
- The Job results are associated with the Assessment so that they can be viewed and published within the context of the Assessment.

3. To return to the Assessment view, click the link under the **Assessment** heading in the Job Results.
4. Repeat Steps 2 and 3 for any other content that you want to run from the Assessment.

### View Content Details

1. Go to **Library > Assessments** and open the Assessment which contains content you want to run.
2. In the relevant table row, select **⋮ more > View Details**. The details for the selected content entry appear.

### View Last Run Results

1. Go to **Library > Assessments** and open the Assessment which contains content you want to run.
2. In the relevant table row, select **⋮ more > View Last Run Results**. The Job Results page for the selected content entry appears.

### Import Security Content

1. Go to **Settings > Director Settings**.
2. Select **Content** (on the left side).
3. Select **Import Content**.
4. Browse to and select the local content file (in .vas format) and click **Upload**.
5. Click the gear icon and wait for it to apply.
6. Once the content successfully imports, the content table shows which content was updated (Evaluations, Sequences, Actions).
