

ARTICLE UPDATES

This page provides several lists of articles: New, Updated, and Popular.

New Articles

If you see the **New** badge, it means the article was created in the past 2 weeks. Click **See More** to see a full list of articles and their created dates.

Articles are ordered based on their published date, not their created date.

Updated Articles

If you see the **Updated** badge, it means the article was updated in the past 2 weeks. Click **See More** to see a full list of articles and the specific updated dates.

We do not use the Updated badge if an article is updated on a more frequent schedule. This primarily happens with some of our Security Validation documents.

Popular Articles

This section is ordered based on the pages with the most views. It is refreshed the first of each month.
