

PRODUCT UPDATE 4.10.2.3 - MAY 10, 2023

If you're on a Mandiant Security Validation (MSV) release prior to 4.12.1.0, you may notice that a license expired watermark appears on the Network Map page on your Director.

This watermark is related to the software that renders the Network Map and does not affect functionality of the product.

Use one of the following options to fix the watermark issue permanently:

- Update to the latest release (4.12.1.0 or later) or migrate to Mandiant Advantage Security Validation (MA-SV).
- As an additional option, you can upgrade to release 4.12.0.1, which provides a fix for this issue and if you need more time to complete the update to 4.12.1.0 or later.

The Mandiant Security Validation (MSV) team is pleased to announce version 4.10.2.3 of the MSV platform.

Bug Fixes

- Fixed an issue that prevented the Tipping Point Remote Integration from properly updating signature information
- Fixed an issue that could cause disabled integrations to continue to consume system resources

Appliance OS Security Update

The latest platform security update can always be found on the [Validation Section of the Docs Portal](#).

(<https://docs.mandiant.com/home/msv-security-patch-downloads>) This security update applies to all versions of the product and are cumulative.

Important Installation Notes

Minimum Director version 4.8.4.0 or higher is required to upgrade to version 4.10.2.3.

To download documentation and software (appliance images, installers, and update packages), visit the [Validation Section of the Docs Portal](#) (<https://docs.mandiant.com/home/security-validation-on-prem-and-saas>). For full details on how to upgrade, see [Updating Security Validation Components](#) (<https://docs.mandiant.com/home/msv-system-updates>).
