

AUGUST 1, 2023 MANDIANT ADVANTAGE THREAT INTELLIGENCE RELEASE

New Versions

- Mandiant Advantage Threat Intelligence (MATI) v3.0.4

New in this Release

- MATI Threat Intel Assistive AI / MATI Search Summarization (Private Preview)
 - Added thumbs up and thumbs down buttons to enable Private Preview users to provide positive or negative feedback on search summaries to help train language models.
- Explore Page Consistency
 - Added a **Follow** button to the Malware Details page.
 - Added a Following tab to enable users to track Malware and Tools that they care about most. When the tab is clicked, all followed entities are displayed and sortable.
 - Eliminated lag that was occurring between user click of the **Follow** button to the updated “Following” state.
 - Updated the layout to Malware and Tools cards on the Explore page.
 - Implemented new navigation that redirects users to the Malware Details page when they select a malware card or tool detail page from the Explore page.
 - Implemented new navigation that redirects users to the Campaign Details page when they select a Campaign card on the Explore page.
 - Changed the “Malware List” header label to “Malware and Tools List”; applied new UX / layout.
 - Updated MITRE ATT&CK® Explore page to use the new Actors 2.0 and Malware 2.0 format.
 - Moved Relevant Reports from the Details section to its own tab on Malware, Campaigns, and Vulnerabilities pages.
- Search
 - Added a nested checkbox selection for source regions in search filters. This supports region / subregion / country trees.
- Actors
 - Added “New in the last month” tooltip for new chips.
 - Changed redirection of “+more” link on Actor card on the Actor Explore page. When users click this link, they are now directed to the relevant section of the Details page.
 - Added Timeline chart to Actors tab with tooltip that displays Actor name and number of matches.
- Vulnerabilities
 - Changed redirection of Exploit Grade Chart. When users click a pie chart slice on the sidebar of a Vulnerability Details page, they are redirected to the Exploits tab.
- Threat Personalization Dashboard (Private Preview)
 - Implemented redesigned MITRE ATT&CK® chart.
 - Added Threat Type tabs functionality for the following pages:
 - Actors
 - Campaigns
 - Malware
 - Vulnerabilities
 - Following
 - Added Relevant Reports table to Malware and Actors tab.
 - Added banner that reads: “To access more relevant content, make sure to follow threat objects and create

your Threat Profile.”

- This banner is persistent until users update configuration.
- Customize Threat Profile (Private Preview)
 - Added “Create Profile” header.
 - Added field for users to input profile name during creation.
- Reports
 - CVE details are now displayed in the extracted Threat Intelligence Tags panel.
- General
 - Completed routine update of all UI and API certificates.

Bug Fixes

- Actors
 - Resolved inconsistent hover states on Actor Details page. All icons and text now turn blue upon hover. Exception: items with colored icons (flags).
 - Changed messaging on Actor Details page when no data is available as follows:
 - **Group Associations:** There are no known confirmed, suspected, or possible group associations at this time.
 - **Associations:** There are no known malware or vulnerability associations at this time.
 - **Targets:** There are no known target industries or regions at this time.
 - Aligned text in the Latest Reports widget.
 - Removed extra margin and padding from Latest Reports widget.
 - Sorted Campaigns by most recent on the Actor Object page.
- Search
 - Enabled selection of current date when setting date search parameter.
- User Management
 - Replaced incorrect customer support email address in error/ information message when attempting to add a user.
- Reports
 - Resolved table formatting inconsistencies and resized images.
 - Fixed issue related to number of Reports displayed so that this number matches what the user specifies.
- General
 - Added “Vietnam” and “UAE” to Target Region filter list on Campaigns filters.
 - Fixed issue of Target Industry value not displaying on Temp.Armageddon Explore card.
 - Resolved formatting issue on MITRE ATT&CK® Explore page.
