

AUGUST 10, 2023 MANDIANT ADVANTAGE THREAT INTELLIGENCE RELEASE

New Versions

- Digital Threat Monitoring (DTM) v1.131.8

New in this Release

- **Alerts**
 - **Bulk Select:** Added ability for users to select all Alerts at one time, even if the Alerts are not rendered in the Alert List.
 - **Multi-alert Select:** Added ability to choose multiple Alerts in the Alert List by pressing **Shift** while selecting applicable Alerts.
- **Seamless Forum Navigation**
 - Provided ability for users to pivot directly to individual forum posts from Alerts.
- **Uninterrupted Research Workflow**
 - Provided ability for users to preserve **Research Tools** search queries and results when switching tabs within DTM.
- **Domain Protection**
 - Updated the **Domain Protection** monitor template to remove extraneous field for **Brand**.
- **Web Interface Enhancements**
 - Implemented several web interface enhancements to improve the user experience.

Bug Fixes

- **Contact Email Domain** and **Service Name** now display properly in **Alert Details** for Shop Listing alerts.
- Alert counts in the **Alert List** now reset properly after refreshing.
- The **Alert Preview** modal is no longer truncated at the top.
- **Domain Discovery** alerts now display properly in **Alert Details** and **Research Tools**.
- **Collection Type** filters in **Research Tools** now display in alphabetical order.
