

## MANAGED DEFENSE

Mandiant Managed Defense is a Managed Detection and Response (MDR) subscription service providing Customers with security event monitoring, threat hunting, and rapid response services 24 hours a day, 7 days a week, 365 days a year. Managed Defense leverages real-time and historical detection capabilities, correlation, artificial intelligence, and the industry's leading global cyber threat intelligence capabilities to deliver a comprehensive and adaptive service.

### **Expert Monitoring**

Managed Defense accelerates triage from a supported list of customer-owned controls including endpoint, network, and OT technologies. Our experts triage your event data, enrich alerts with Mandiant threat intelligence, and apprise you of what is important and why.

### **Reduce Dwell Time and Find Advanced Adversaries**

Managed Defense integrates frontline knowledge and attacker research to continuously hunt for hidden attackers. Managed Defense threat hunting uses up-to-the-minute threat intelligence and maps the high-fidelity findings to the MITRE ATT&CK framework so you can see which controls were subverted. You can follow hunting activities as they unfold and review intelligence linked to the findings.

### **Rapid, Complete Response**

Managed Defense leverages Mandiant's experience of more than 200,000 hours responding to attacks each year and resolves 99% of customer incidents without the impact or need to transition to a costly incident response engagement. Managed Defense SOC and advanced analytics teams work to understand the full extent of attacker activity to guide a complete response.
