

## WORKFLOW SEEDS

### Workflow Seeds

The following table outlines which integrations and Seeds are accepted by each Workflow.

Workflow →	External Discovery & Assessment (Standard)	Authenticated Cloud Discovery & Assessment	Code Repository Discovery & Assessment (Beta)	Suspicious Domain Discovery (Beta)	Mobile App Discovery (Beta)	Web Application Discovery (Beta)	Third Part Monitorin (Read Only)
Seed ↓							
<b>Integrations available to be added</b>	All Cloud and DNS Integrations	All Cloud Integrations	GitHub Integration Only	None	None	None	None
<b>DnsRecord</b>	✓						
<b>Domain</b>	✓			✓			
<b>IpAddress</b>	✓						
<b>NetBlock</b>	✓						
<b>Uri</b>	✓					✓	
<b>Nameserver</b>	✓						
<b>UniqueKeyword</b>	✓		✓		✓		
<b>GithubAccount</b>			✓				
<b>GithubRepository</b>			✓				

The **Legacy** Workflow supports all **inbound integrations** (<https://docs.mandiant.com/home/asm-inbound-integrations>) and all the Seeds listed in this table as well as `ApiEndpoint` , `UniqueToken` , `AwsS3Bucket` , `EmailAddress` , and `AutonomousSystem` .
