

COLLECTION SCAN RATE

In Mandiant Advantage Attack Surface Management (MA-ASM), scan rate is the frequency with which Collection scans are initiated. MA-ASM scan rate options are:

- **On Demand:** Scans must be manually initiated.
- **Daily**
- **Weekly**
- **Monthly**
- **Quarterly:** Only available for Freemium users.

 The scan rate for Freemium users is limited to once a quarter.

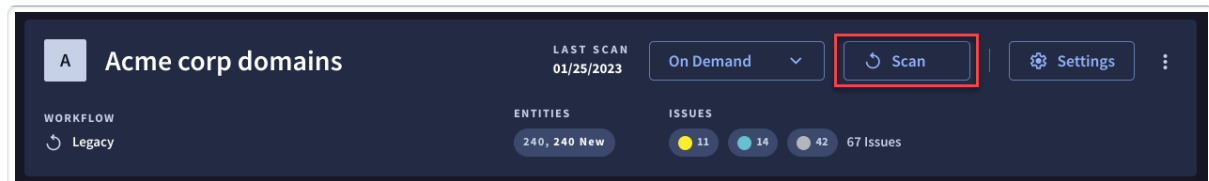

Manually initiate a Collection Scan

Collections Scans can be initiated on demand regardless of the scan rate listed.

 This feature is not available to Freemium users.

1. In MA-ASM, from the **Collections** menu, select **Settings**.
2. To initiate a scan, click **Scan** associated with any Active Collection.

 Collection scans run for a maximum of 72 hours.

Change the scan rate for a Collection

 Only users with Project Owner or Collection Admin permissions can change scan rates. For more information, see **ASM Roles and Permissions** (<https://docs.mandiant.com/home/asm-roles-and-permissions>).

1. In MA-ASM, from the **Collections** menu, select **Settings**.
2. For any Active Collection, select the drop-down to select a different scan rate.
