

INBOUND INTEGRATIONS

Using inbound integrations, Mandiant Advantage Attack Surface Management (MA-ASM) leverages the API of various infrastructure vendors (DNS, cloud, and code repositories) to automatically pull or retrieve assets upon every scan refresh.

Mandiant Advantage Threat Intelligence (MATI) is directly applied to your attack surface. For more information, see [ASM's Mandiant Advantage Threat Intelligence Integration \(https://docs.mandiant.com/home/asm-mati-integration\)](https://docs.mandiant.com/home/asm-mati-integration).

For detailed information about how MA-ASM safeguards your credentials, see [Attack Surface Management Credential Security Details \(https://docs.mandiant.com/home/asm-credential-security-details\)](https://docs.mandiant.com/home/asm-credential-security-details).

The following inbound integrations are supported by MA-ASM:

DNS and CDN Integrations

- [Akamai \(https://docs.mandiant.com/home/asm-akamai-integration\)](https://docs.mandiant.com/home/asm-akamai-integration)
- [Cloudflare \(https://docs.mandiant.com/home/asm-cloudflare-integration\)](https://docs.mandiant.com/home/asm-cloudflare-integration)
- [DNS Made Easy \(https://docs.mandiant.com/home/asm-dns-made-easy-integration\)](https://docs.mandiant.com/home/asm-dns-made-easy-integration)
- [GoDaddy \(https://docs.mandiant.com/home/asm-godaddy-integration\)](https://docs.mandiant.com/home/asm-godaddy-integration)

Cloud Integrations

- [AWS \(https://docs.mandiant.com/home/aws-integration\)](https://docs.mandiant.com/home/aws-integration)
- [Azure \(https://docs.mandiant.com/home/asm-azure-integration\)](https://docs.mandiant.com/home/asm-azure-integration)
- [Google Cloud \(https://docs.mandiant.com/home/asm-gcp-integration\)](https://docs.mandiant.com/home/asm-gcp-integration)

For information about scaling the AWS or Google Cloud integrations, see [Scale AWS Integration Across AWS Organizations \(https://docs.mandiant.com/home/asm-scale-aws-integration-across-aws-organizations\)](https://docs.mandiant.com/home/asm-scale-aws-integration-across-aws-organizations) or [Scale Google Cloud Integration \(https://docs.mandiant.com/home/asm-scale-gcp-integration\)](https://docs.mandiant.com/home/asm-scale-gcp-integration).

Other Inbound Integrations

- [Github \(https://docs.mandiant.com/home/asm-github-integration\)](https://docs.mandiant.com/home/asm-github-integration)

Inbound Integrations Video

Inbound Integrations cannot be connected to all Collections. The integrations accepted by a Collection depend on the Workflow associated with the Collection. For information, see [Workflow Seeds \(https://docs.mandiant.com/home/asm-workflow-seeds\)](https://docs.mandiant.com/home/asm-workflow-seeds).
