

NOVEMBER 17, 2023 MANDIANT ADVANTAGE THREAT INTELLIGENCE RELEASE

New Version

- Mandiant Advantage Threat Intelligence (MATI) v5.8.3

New in this Release

Indicator Threat Score (Public Preview)

- Implemented the following enhancements:
 - Removed conditional logic that hid the Indicators tab.
 - Toggle buttons are hidden when no Indicators are available for the object type.
 - When filtered Indicators are empty, the following message displays: "No indicators found for report with this filter."

For more information, see [Indicator Threat Score Methodology](https://docs.mandiant.com/home/mati-indicator-threat-score-methodology) (<https://docs.mandiant.com/home/mati-indicator-threat-score-methodology>).

- The Threat Score toggle has been repositioned and updated in the following places:
 - Indicators tab on Actor, Campaign, and Malware & Tools pages.
 - Indicator Details page.
- If no Actor is associated with an Indicator, **Associated Industries** and **Associated Regions** are populated from the **Associated Campaign**, if available.
- In the Threat Score web console, associated reports are linked directly from the Indicator summary when `fintel` is flagged as a Severity reason in the Severity scoring model.
- The **Relevant Reporting** widget now displays on the Threat Score page.
- When the dates for **First Seen** and **Last Seen** are the same on the timeline, the **Last Seen** label is displayed.

Bug Fixes

- Web Interface updates:
 - Icons within links are no longer underlined.
 - Link and text size now match in the link for Service Requests support.
 - Updated the MITRE ATT&CK icon.
- The Campaign card now displays **Target Regions** and **Target Industries** directly on the card.
- Resolved issue causing intermittent error on login.
- **Indicators** tab now shows all Indicators for reports.
- Users can now download all Indicators for a report.
- Decoupled the Indicators table and API call so that higher-level components pull data, and the table is only responsible for filtering and displaying it.
- Resolved text overlap in the **Indicator Value** tab of Reports Detail page.
- **Source Region** filters on Explore page now match Search filters.
- Expertise on Demand (EOD) form now scrolls beyond the height of the current browser window.
- Menu items in the Actor graph now display properly.
- Dropdown elements on Graph tabs are properly aligned.
