

JANUARY 30, 2024 MANDIANT ADVANTAGE THREAT INTELLIGENCE RELEASE

New Version

- Mandiant Advantage Threat Intelligence (MATI) v5.14.5

New in this Release

• Public Preview Threat Profiles

- For SecOps customers: View the threat profile and see details of Actors, Malware, and Campaigns, along with a subset of reports in this subscription tier (subscription [details \(https://advantage.mandiant.com/upgrade\)](https://advantage.mandiant.com/upgrade)).
- For Fusion customers: View the threat profile and see all details of Actors, Malware, Campaigns and Vulnerabilities, along with all Finished Intelligence reports (subscription [details \(https://advantage.mandiant.com/upgrade\)](https://advantage.mandiant.com/upgrade)).
- Manually add threats to your profile via the following functionality for Actors, Malware, Campaigns and Vulnerabilities.
- Automatically receive recommended threats to track via Mandiant's proprietary AI/ML model which has been tuned and reviewed by Mandiant intelligence experts.
- Tailor the number of AI/ML threats recommended by Mandiant to at least 5, 10, 15, or 20.
- Customize interests to receive AI/ML threat recommendations such as industry, location or location.
- Provide in-product feedback around the Mandiant threat recommendations with a thumbs up and down.
- Improved onboarding flow and navigation as you create new threat profiles.
- Change event data for every Actor, Malware and Campaign in your threat profile including both manually added threats via Follows and Recommended threats via the AI/ML model.
- Sort the list of threats by relevance.
- AI/ML recommendation reasons for easier explainability
- Support for multiple profiles per user.
- Easily manage threat profiles on the threat profile management page where you can view all and customize, copy, delete.
- Visualize top recommended actors to track (for AI/ML actor recommendations only).
- Enhanced exportability including downloads for: indicators, TTP Heatmap (csv), (Actors, Mal, Camps), and YARA rules for Malware families.

• Replaced Most Active Vulnerabilities widget with Zero Day Exploits

• Updated Browser Plug-in to include Campaigns

Bug Fixes

- Fixed inconsistent data on Trending Malware widgets
- Fixed pagination on Explore pages
- Fixed indicator downloads on Reports and Analysis pages
