

FEBRUARY 26, 2024 MANDIANT ADVANTAGE THREAT INTELLIGENCE RELEASE

New Version

- Digital Threat Monitoring (DTM) v1.150.38

New in this Release

- When hovering over the relative timestamp in the Alert List view, users see the absolute timestamp
- Animation is added during configuration of the Compromised Credentials monitor to enhance the user experience
- The Compromised Credentials Domain Ownership Verification Code info icon text is updated to be more helpful

Bug Fixes

- Users are able to properly select alerts when using the Firefox browser
- Research Tools search term highlighting has been fixed for Web Content Publish and Forum Post documents
- Disabling or deleting a monitor immediately takes effect
- The Compromised Credentials monitor logic and flow has been updated for a better user experience
- A Domains Added Success Banner will no longer show unless it's supposed to
- The "Erbium" threat name link correctly links to the appropriate URL
- The term "product_batch_name" is correctly mapped to the user friendly term "Batch"
- The status "No_action_required" is correctly mapped to the user friendly term "No Action Required"
