

## PRODUCT UPDATE 5.13.0.1 - APRIL 4, 2024

The Mandiant Security Validation (MSV) team is pleased to announce version 5.13.0.1 of the MSV platform.

### General Enhancements

- Performance and stability improvements

### Bug Fixes

- Fixed an issue where configured query times were not being honored for multiple integrations

### Known Issues

- Local Event Filtering works as expected but is limited to Match Action, Match Integration, and Match Events (when the latter involves Raw Events). If a rule has a Match Event condition for any field other than Raw Event, the rule does not apply to Local Events. It only applies to events from standard local integrations in MSV.
