

RUN A CAN TALK TO ACTOR (CTTA) UPDATE

Can Talk to Actor (CTTA) refers to automated discovery of connectivity between Actors using port scans. While this process is automatic, you can also use the following steps to run a CTTA update to manually refresh the discovery between Actors.

1. From the Director web interface, go to **Environment > Actors**.
2. Click **⋮ more > Edit**.
3. Scroll to **Can Talk To Actors** and then click **Update Info**.
4. Optional: go to **Jobs > Queue** to check the CTTA status.
