

MAY 13, 2024 MANDIANT ADVANTAGE THREAT INTELLIGENCE RELEASE

New version

Digital Threat Monitoring (DTM) v1.154.41

New in this release

- When creating a Compromised Credentials monitor, domains that differ only by case are not allowed.
- Hashes in both the Alert Details and Research Tools views are truncated.
- The Compromised Credentials Password Policy text has been updated.
- Backfilling alerts will only show 10,000, even if the estimate is higher. This is because we will never backfill more than 10,000 alerts.
- Auto scroll is removed when opening a Messages alert or document.

Bug fixes

- Fixed an issue where a link to the DTM Email Notifications in the monitor view was only shown for DTM Admins.
- Fixed an issue where users were not able to right-click when using the DTM Test Monitor functionality.
- Fixed an issue where users weren't able to select/update the status of an alert in the Firefox browser.
- Minor bug fixes, performance updates, and web interface updates.
