

# MAY 21, 2024 MANDIANT ADVANTAGE THREAT INTELLIGENCE RELEASE

## New version

- Mandiant Advantage Threat Intelligence (MATI)
- Digital Threat Monitoring (DTM) API v0.1.329

## New in this release

### MATI

- Added support for the following vulnerability change events in MATI:
  - Severity score upgraded to high or critical
  - New publicly available exploit
  - Exploitation state changes to actively exploited
- Improved loading indicator when updating profile recommendation inputs (for example, adding a new industry).
- Added placeholder text for when Threat Objects don't have last update timestamps.
- Profiles can be set to have a maximum of 20 ML-recommended objects per type.

## Bug fixes

### DTM API

- Fixed an issue where attachments were not shown on the Analysis tab of an alert.
- Fixed an issue where an error was shown when deleting attachments on the Analysis tab of an alert.
