

PRODUCT UPDATE 5.14.1.2 - JANUARY 14, 2025

The Mandiant Advantage Security Validation (MA-SV) team is pleased to announce version 5.14.1.2 of the MA-SV platform.

Bug fixes

- Fixed an issue where all scheduled and AEDA Jobs were failing.

Known issues

- When you add the first MSI integration on a Remote Integrations Actor, the integration does not get detected. To fix this, reboot the Actor after the first MSI integration is selected for that Actor.
- Local Event Filtering works as expected but is limited to Match Action, Match Integration, and Match Events (when the latter involves Raw Events). If a rule has a Match Event condition for any field other than Raw Event, the rule does not apply to Local Events. It only applies to events from standard local integrations in Security Validation.
