New version

Digital Threat Monitoring (DTM) v1.177.0

Bug fixes

- Fixed an issue where the **Create Monitor** button was incorrectly validating fields, enabling users to create monitors with invalid fields. Added the necessary validations.
- Fixed multiple issues where users without DTM roles were able to view the following pages that now display an error message:
 - `/test` (404 error)
 - `/alerts/ALERT_ID` (404 error)
 - `/monitors/MONITOR_ID` (404 error)
 - `/add-monitor?` (403 error)
