

PRODUCT UPDATE 5.14.3.0 - MAY 22, 2025

The Mandiant Advantage Security Validation (MA-SV) team is pleased to announce version 5.14.3.0 of the MA-SV platform.

Enhancements

- Added a feature where Integration tables can now be sorted.

Bug fixes

- Fixed an issue where Job Action Reports would not reliably export.
- Fixed an issue where a user's organization could be difficult to ascertain.
- Fixed an issue where event correlation was not displayed correctly in sections of the Job Results page.
- Fixed an issue where an Actor's last comms would not display successful recent updates.
- Fixed an issue where editing the correlation time of an Integration was not affecting the configuration.
- Fixed an issue where support logs could not be cancelled and would keep running.
- Fixed an issue where attempting to update a scheduled job from Run Once to Repeating would not affect the scheduled Job.
- Fixed an issue where exporting reports would not show Errored Job Results correctly.
- Fixed an issue where Chronicle Backstory would not save or report its last query.
- Fixed an issue where confirmations involving Protected Theater or Email Readiness were not displaying consistently.

Known issues

- When you add the first MSI integration on a Remote Integrations Actor, the integration does not get detected. To fix this, reboot the Actor after the first MSI integration is selected for that Actor.
- Local Event Filtering works as expected but is limited to Match Action, Match Integration, and Match Events (when the latter involves Raw Events). If a rule has a Match Event condition for any field other than Raw Event, the rule does not apply to Local Events. It only applies to events from standard local integrations in Security Validation.
