

## PRODUCT UPDATE 4.14.3.3 - JULY 17, 2025

The Mandiant Security Validation (MSV) team is pleased to announce version 4.14.3.3 of the MSV platform.

### Enhancements

- Add an option to change the default setting for file transfers.

### Bug fixes

- Fixed issues where users were unable to edit and save changes to an existing Google Chronicle Backstory integration.
- Fixed an issue where **Jobs > Job Status** was not showing results.
- Fixed an issue where Mandiant-created TAAM Evaluations were taking too long to run.
- Fixed an issue where the Action title in a list didn't update until the page was refreshed.
- Fixed an issue where long-running Evaluations (with 4000 or more Actions) were behaving inconsistently and moved to an Errored state.

### Known issues

- Local Event Filtering works as expected but is limited to Match Action, Match Integration, and Match Events (when the latter involves Raw Events). If a rule has a Match Event condition for any field other than Raw Event, the rule does not apply to Local Events. It only applies to events from standard local integrations in MSV.
- Network configuration may reset unexpectedly. To resolve the issue, run `vsetnet` after the upgrade with static IP addresses for one or more interfaces.

### Appliance OS Security Update

The latest platform security update can always be found on the [Validation Section of the Docs Portal](#) (<https://docs.mandiant.com/home/msv-security-patch-downloads>). This security update applies to all versions of the product and is cumulative.

### Important Installation Notes

Minimum Director version 4.12.0.0 or higher is required to upgrade to version 4.14.3.3.

To download documentation and software (appliance images, installers, and update packages) visit the [Validation Section of the Docs Portal](#) (<https://docs.mandiant.com/home/security-validation-on-prem-and-saas>). For full details on how to upgrade, see [Updating Security Validation Components](#) (<https://docs.mandiant.com/home/msv-system-updates>).
