

NOVEMBER 5, 2025 MANDIANT ADVANTAGE THREAT INTELLIGENCE RELEASE

New version

Digital Threat Monitoring (DTM) v1.186.0

Enhancements

- Added a truncated view, depending on the alert size, and a banner notifying the user that the full content of the alert could not be rendered due to the size of the document. This reduces the likelihood of a slow or unresponsive web interface.

Bug fixes

- Fixed an issue where some Mandiant documentation references weren't resolving to the correct URL.
